

Addressed issues.

- Issue #19 was addressed by creating a updating UML diagram and adding all the classes implemented till itr3 in the UML diagram
- Issue #18 was addressed by adding large number of tests and testing the functionality of the classes have been added.
- Issue #17 wasn't addressed with since the code works just fine on the current version of java and does not plan to be implemented on newer version of java. Method currently works and gives proper result without error.
- Issue #16 was fixed by removing the loop from the getTotal method.
- Issue #15 the jar file was updated as well as the database and the code works just fine
